

## Paragraph Text Editing Commands

The following keys can be used to modify strings prior to terminating the text placement:

<CR>	Terminates a line of text and inserts the string into the work layer.
<b>PARAGRAPH</b>	Opens the next line of text.  Two <CR>'s terminates input and inserts the string into the work layer.  If a <CR> is used in the middle of a line, it will push the text from the cursor location to the end of the line onto a new line of text below. All other lines of text will be pushed down.
<b>BKSP</b>	Deletes one character to the left.
<b>PARAGRAPH</b>	If the cursor is at the beginning of a line, the text on that line is pulled up to the end of the previous line and all line below are pulled up as well.
<b>INS</b>	Terminates a line of text and inserts the string into the work layer. This can be used with any cursor location on the line.
<b>DEL</b>	Deletes one character to the right of the cursor.
<b>TAB</b>	Toggles a PAN/ZOOM mode <i>on</i> or <i>off</i> . Selecting a <CR> will also toggle <i>off</i> this mode.
<b>PAN</b>	After selecting the TAB key the left, right, up, and down arrow keys will pan the drawing or sheet.
<b>ZOOM</b>	After selecting the TAB key the +/- and - keys will zoom the drawing or sheet in or out.
←	Moves the cursor one character to the left.
→	Moves the cursor one character to the right.
↑	Moves the cursor up one line of text. The cursor will remain in relative position in the line of text as it moves down. The cursor cannot be moved beyond the bottom of the file, thus opening new lines of text.
↓	Moves the cursor down one line of text. The cursor will remain in relative position in the line of text as it moves up. The cursor can be moved beyond the top of the file.
<b>HOME</b>	Moves the cursor to the beginning of the line of text.
<b>END</b>	Moves the cursor to the end of the line of text.
<b>PAGE UP</b>	Moves the cursor to the top of a paragraph of text.
<b>PAGE DOWN</b>	Moves the cursor to the bottom of a paragraph of text.
<b>CTRL-A</b>	Merges (Adds) the text from the cursor position to the end of the line to the beginning of the line below.
<b>CTRL-D</b>	Deletes the text from the cursor position to the end of the line.
<b>CTRL-F</b>	Copies the text from the cursor position to the end of the line and places it into a copy buffer.
<b>CTRL-V</b>	Pastes the text in the copy buffer at the current cursor location.
<b>CTRL-X</b>	Deletes (cuts) the text from the cursor position to the end of the line and places it into a copy buffer.
<b>CTRL-R</b>	Reformats a paragraph of existing text based on the new wrap margins. All lines of text from the start of the paragraph to the end of the paragraph will be reformatted.
